

MGK1-RGB Custom Color

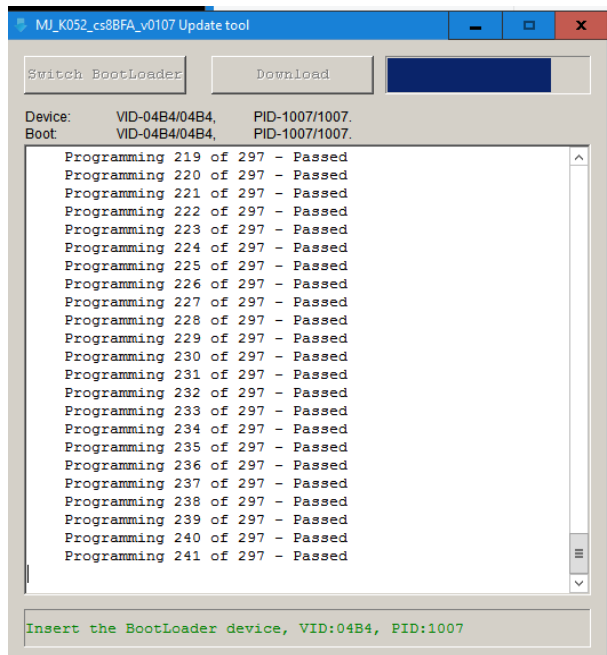

Reset Instructions

After this patch you will be able to push FN+Escape to reset all colors. This process is non reversible and you will be able to reset colors at any time not just in custom mode. Please make sure to finish all steps before continuing with any other task. Please only use this when you are ready to reset the custom colors as this will reset the colors upon installation. This process should take no more than 5 minutes. If you have any questions feel free to contact our support team at Support@AzioCorp.com.

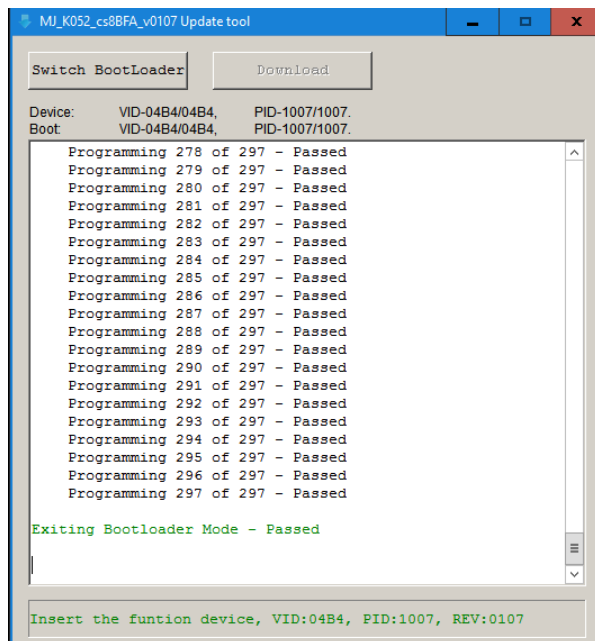

1. Make sure the keyboard is connected directly to the computer without the use of any USB hubs or extension.
2. Run the software and use password "123456" and push ok.
3. Click on "Switch Boot Loader".

4. All LED indicators light will flash and "Switch Boot Loader" will be grayed out. Continue to click "Download" and the patch will begin.

5. Once the program has stopped you will receive this screen and you are all set. The patch will rest your keyboard and flash into spectrum mode similar to when you plug in the keyboard.

6. you can exit the program and you will now have the use of "FN" + "Escape" to reset your custom colors.

- END -
