**KB540** 

## WATERPROOF LARGE FONT BACKLIT KEYBOARD WITH ANTIMICROBIAL PRODUCT PROTECTION FOR MAC

## **FEATURES**

**SPECS** 

Switch Type

Membrane Switch

Interface

USB

N-Key Rollover

6KRO

Backlight

Blue, Red, Purple

Antimicrobial

\_\_\_\_\_

Antimicrobia Testing Test Method: ISO 22196

**SYSTEM** 

OS Support

Mac OS X 10. 10 or Newer Version

**CONTENTS** 

Package

KB540 Keyboard, User Guide

## ANTIMICROBIAL PROCESS

A silver-based inorganic agent is added to the exterior parts of all AZIO Anti-bac keyboards and mice.

The silver ions contained in the agent react with enzymes within the microbes.

The agents will make the enzymes inhibitable on the product surface, hence lead of the elimation of the enzymes.

04

Besides antimicrobial affect, additional benefits of the silver ion agents are: Heat Resistance, Sustainability, & Safety
